

HX260/HX300

CRAWLER EXCAVATOR

Gross Power

HX260 171 kW (229 hp) at 1900 rpm
HX300 208 kW (279 hp) at 1800 rpm

Bucket Capacity

HX260 0.60 - 1.41 m³
HX300 0.45 - 1.63 m³

Operating Weight

HX260 26170 - 28220 kg
HX300 31610 - 34620 kg

building a
comfortable
tomorrow

HYUNDAI

THE NEXT LEVEL

Hyundai Next Generation crawler excavators are quite simply, Next Level. Equipped with advanced electrohydraulic control systems, the HX260 and HX300 models achieve a minimum of 25% increase in productivity. Next Generation features and smart technologies make these new machines easier to maintain with lower total cost of ownership. Two 12.8-inch full HD touch screens and electric joystick steering make for productive operating, while a 6-camera system and radar offer an unobstructed 360° view for added safety.

NEXT LEVEL EFFICIENCY

The HX260 and the HX300 are the pinnacle of efficiency in the industry. Their new FEH (Fully Electrohydraulic) system improves fuel consumption by controlling flow rate via an EPOS (Electric Power Optimising System). And because everything from the joysticks to pump are electric, there is no hydraulic loss as in a normal system. So, on top of using less fuel, the machines have faster and more precise control.

New Hyundai Stage 5 engine

Our new robust engine uses high strength steel with heat and wear resistant material. It consumes up to 7% less fuel vs our A Series machines, and 30% less AdBlue. It also benefits from long maintenance intervals: 1,000-hour filter and oil and DPF ash cleaning over 8,000 hours.

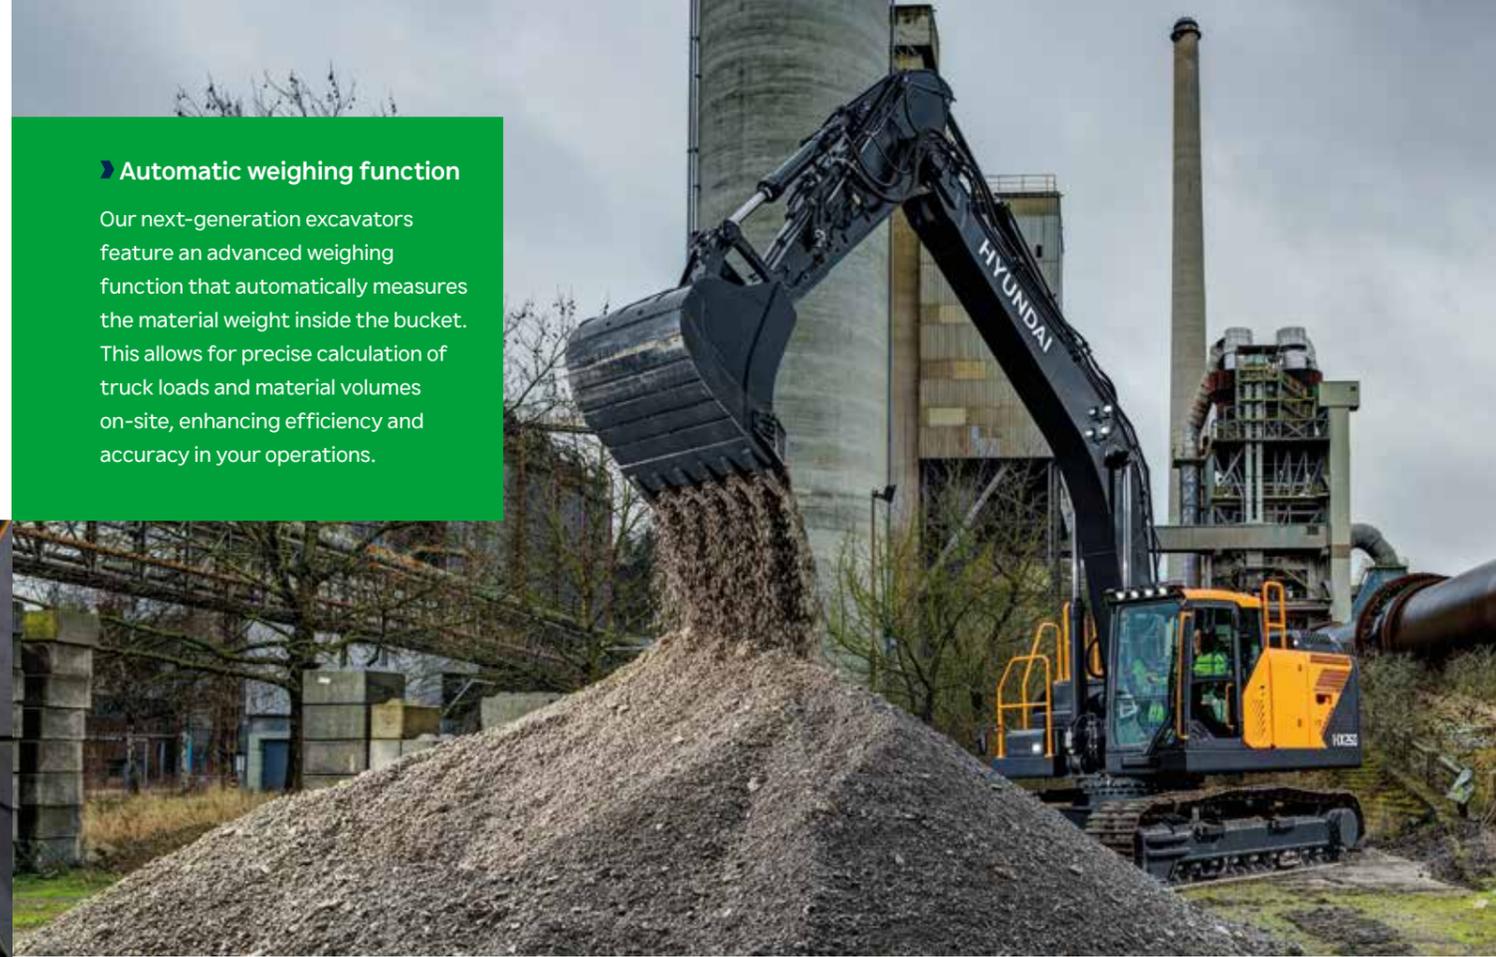

Optimised for every application

Choose from multiple boom and arm lengths matched to ideal bucket sizes, maximising digging power, reach, and loading efficiency for faster cycles, higher productivity, and optimal performance on every job.

Automatic weighing function

Our next-generation excavators feature an advanced weighing function that automatically measures the material weight inside the bucket. This allows for precise calculation of truck loads and material volumes on-site, enhancing efficiency and accuracy in your operations.

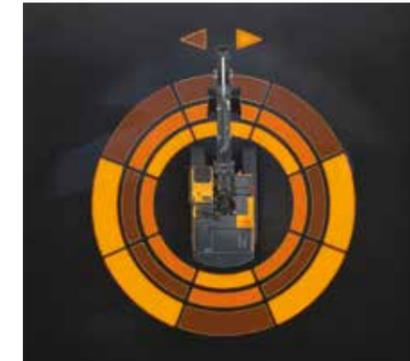

E-boundary

The E-boundary setting can be used to set ceiling, floor and wall limits, which all help to increase productivity and provide greater safety.

Machine guidance

2D MG/MC (Machine Guidance / Control) bucket assist ensures the bucket angle can be automatically stable, preventing soil spillage, while swing assist and grade control allow a swing angle limit to be set, preventing collision with buildings or endangering pedestrians.

Lift Assist

Lift Assist provides operators with a visual guide divided into four quadrants, indicating safe zones for moving a load during lifting. This helps prevent overloading and ensures stability. Lift Assist Pro provides additional information with the working zone split into 8 areas.

NEXT LEVEL COMFORT

Our Next Generation excavators set new standards in operator comfort thanks to the new improved controllability and customisability brought about by the FEH (Fully Electrohydraulic) system. On top of the superior control and comfort, the advanced infotainment system with cutting-edge convenience technology completes the efficient working experience and along with many other new features, provides the perfect cab environment.

◀ Separate driving pedal

Unlock a new level of convenience with the smart key. Easily locate your machine with the search function and activate the coming/ leaving home light for added safety. Effortlessly control access and start the engine with the touch of a button.

Digital key **OPTION**

This new option allows the engine to be started and the cabin to be opened and closed from a smart phone, improving user friendliness and comfort even more. The Digital Key can be shared across 6 different users.

◀ Attention to detail

New lighting and an easy to clean luxury floor mat add sophistication to the machine interior. A cab welcome light helps operators access and exit the cab safely in poor light conditions.

▶ High resolution monitors

2 new FHD-grade 12.8" high resolution monitors display different functions and allow the operator to personalise the information shown.

▶ Comfort pack

With prestige cab branding, the comfort package gives you a premium seat, multi-channel speakers and luxury mat. Convenient left and right stick steering (standard on both machines), allows forward/backward operation and left/right turn driving. Improved lever operability and the electronic hydraulic system help optimise performance and increase safety.

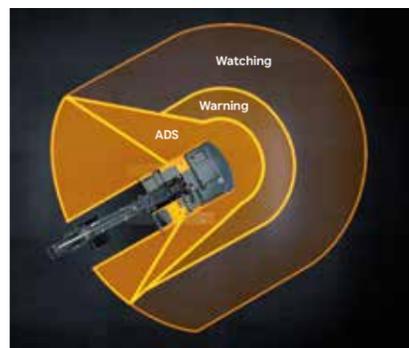

NEXT LEVEL SAFETY

Hyundai Construction Equipment has set new levels in operator and site safety with an abundance of new technologies. These include: E-boundary, Remote control, SAVM (Smart Around View Monitor), radar object detections and many other important measures. This is all on top of the existing industry leading visibility, visual and auditory support technologies and first-class cluster information.

SAVM (Smart Around View Monitor)

This innovative feature uses 6 cameras located around the machine, including 3 embedded in the counterweight. Using AI, the system automatically detects human presence during machine operation to inform the driver. Images are checked on the 12.8-inch high resolution screen.

ADS (Advanced Detection System)

The Advanced Detection System automatically stops the machine when danger arises. If an object enters the warning zone, the system slows or stops the machine, alerting the operator in advance.

4-corner beacon system

The 4-corner cab-mounted warning beacons provide 360-degree visibility, enhancing safety around the machine. As an extra warning aid, an external microphone allows the operator to communicate outside of the cab.

Superior worksite awareness

The wide lower cabin door and full mirror package provide exceptional visibility, enhancing safety and operator confidence.

Activate Auto Safety Check

The Auto Safety Lock prevents unintended operation due to the excavator not being controlled solely by the RCV lever.

NEXT LEVEL SERVICEABILITY

Hyundai construction machines already have some of the highest levels of serviceability in the industry, but the HX260 and HX300 take them a step further. On top of greater machine and component durability with less maintenance needs and greater servicing accessibility, new Hyundai technologies further improve machine monitoring to keep you informed about machine health and improve serviceability.

Robust design

The strong upper and lower structure can withstand external impacts and high-load work. Optional double or full track guards give additional protection when operating in harsh environments.

Increased protection

The new machines have been smartly designed to withstand even higher impacts against the upper structure, boom and dipper. We've also added better protection for the hydraulic lines.

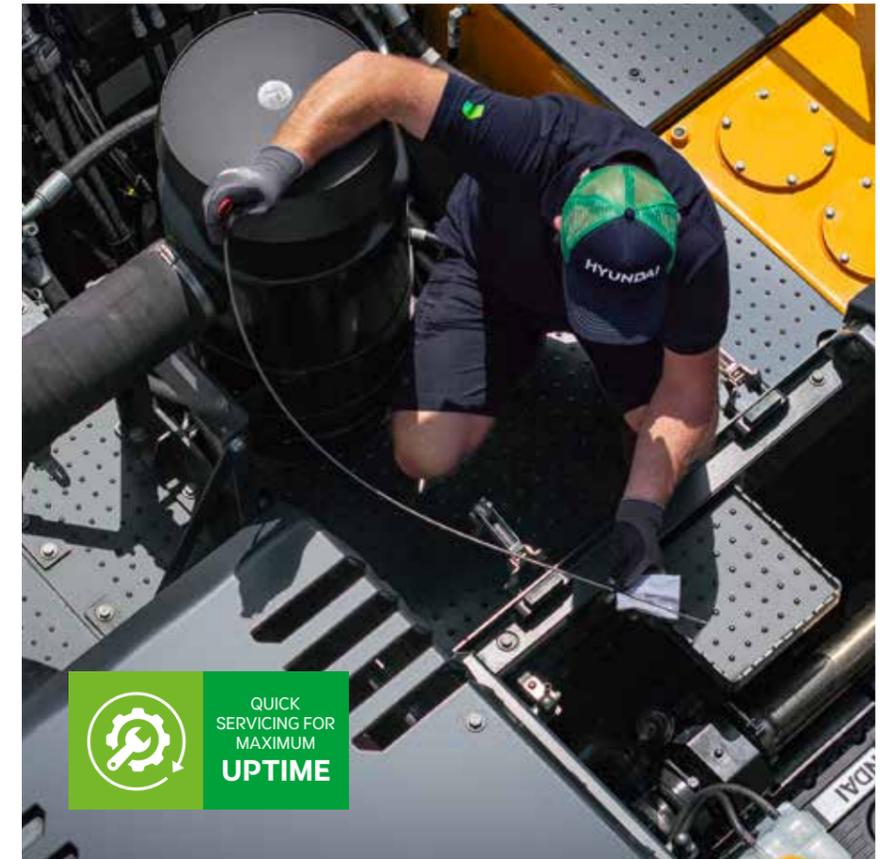

Reversible fan

The reversing fan keeps the cooling package clean of debris ensuring optimum cooling performance.

Improved low temperature start-up

The support system heats the coolant with an electric heating wire inside the engine via an external power source to increase the internal temperature of the engine, thereby assisting start-up in extremely low-temperature environments.

QUICK
SERVICING FOR
MAXIMUM
UPTIME

Hi MATE

Hi MATE's real-time information allows easy and convenient remote machine monitoring via the Hi MATE website or mobile app.

Increased productivity

By providing information such as usage and maintenance notification reports, Hi MATE saves time and money by enabling you to plan ahead.

Improved security

To protect your equipment from theft or unauthorised usage, Hi MATE's geofencing alerts notify you automatically when a machine leaves a predetermined zone.

EHM (Equipment Health Monitoring)

This new technology enables real-time monitoring of equipment conditions and predicts potential failures to optimise maintenance and operational efficiency.

PROCARE. MORE CARE FOR YOU AND YOUR MACHINE.

ProCare, Hyundai's tailored maintenance packages work proactively via Hi-MATE by automatically delivering service kits directly to dealers before any service is due. This gives you peace of mind knowing that your machine will be serviced on time, with genuine parts and with no extra costs or inflationary increases. Choose the tailored maintenance package best suited for your needs.

KEY BENEFITS

Automatically delivered filter kits

Oil sampling every 1,000 hours

Fixed prices invoiced upfront

Uptime Centre and dealer support

PRO CARE

TAILORED MAINTENANCE PACKAGES

MainCare

Stay ahead on service with Hyundai MainCare

MainCare keeps you ahead of maintenance with predictable costs and zero hassle:

- Lock in your filter costs for up to 4 years or 5,000 hours – no surprises, just smooth running.
- Oil sampling at 1,000 hours helps catch issues early and extend component life.
- Your dealer contacts you when service is due – no chasing, no delays.
- Filters always in stock – ready when you are.
- You choose: service it yourself or let your dealer handle it.

FullCare

Complete coverage and confidence with Hyundai FullCare

Everything you get with MainCare, plus up to 4 years extended warranty at discounted price – for complete coverage and confidence:

- Fixed filter costs.
- Proactive service reminders.
- Oil sampling with expert reports.
- Guaranteed parts availability.
- Extended warranty up to 4 years

- Lifting capacity is based on ISO 10567.
- Lifting capacity does not exceed 75% of tipping load with the machine on firm, level ground or 87% of full hydraulic capacity.
- The lift-point is where the bucket pivot mounting pin intersects with the arm (without bucket mass).
- (*) indicates load limited by hydraulic capacity.
